DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 31 is rejected under 35 U.S.C. 102(a) as being clearly anticipated by the admitted prior art in paragraphs 10 and 11 of the application.

The admitted prior art anticipated the language of claim 31, since the known strategies determine or “calculate” regions in which it is “efficient to turn-off spacecraft thrusters”, such as regions which are not “some region about apogee to correct inclination and raise the perigee altitude” by firing thrusters. The selection of firing regions “based on experience with impulsive maneuvers” anticipates the claim language.

3. Claims 1-30 are allowed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eyerly, Rockwell, Claffey et al, Small et al, and TRW Space Data are cited as being of interest since they disclose orbit calculations.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Woodrow Eldred whose telephone number is 703-306-4151. The examiner can normally be reached on Monday to Thursday, from 8:00 a.m. to 5:30 p.m..
